

AMWC 2024 Monaco: *what to expect*

On 27–29 March 2024, AMWC returns to Monaco, with its Advanced Facial Aesthetic Masterclass taking place on 26 March. This is a must-attend for aesthetic medicine practitioners who wish to elevate their skills, learn about the industry's latest advancements and connect with top brands and KOLs.

This year's programme includes thought-provoking sessions such as 'The Art of Subtle' which aims to combat overfilled syndrome by exploring how to achieve natural looking results with filler, toxin, and regenerative injectables.

The program pushes boundaries with its keynote lecture, 'The Tyranny of Appearance'. This session provides a disruptive reflection on society's beauty perceptions. Does placing excessive importance on physical appearance affect the significance of being? How does outward beauty reflect inner beauty? These are just a few of the pivotal questions being

considered by French philosopher Raphaël Enthoven in this presentation.

AMWC features an auditorium dedicated to live demonstrations, with focus zones including lips, the periorbital area, the nasal area, and the key facial thirds. All live demonstrations are performed by masters of their craft, many of whom have revolutionised their specialities.

With just one month to go, make sure to secure your spot at the world's leading aesthetics and anti-aging medicine congress, AMWC Monaco. [▶ JAN](#)
